

Press release

Meyer Optik Görlitz - a real company again!

- New foundation as independent company
- What will change?
- The next steps

Bad Kreuznach – 05th August 2021 – Meyer Optik Görlitz, until now a brand name only, is operating as an independent company with immediate effect, thus manifesting its basis for future developments.

"After almost 3 years of hard and intensive work, we are very happy to have laid the foundation for an independent Meyer Optik Görlitz GmbH and to be able to put it on its own feet" says Timo Heinze, Managing Director of the new Meyer Optik Görlitz GmbH. "After we, under the umbrella of OPC Optics, developed the brand's portfolio and established sales structures, the time has now come for Meyer Optik Görlitz to step out of the shadows as a 'real' company and operate independently on the market."

New foundation as a company

At the end of 2018, OPC Optics took over the "Meyer Optik Görlitz" brand and has since completely rebuilt the entire structure, including the portfolio. The consequence of this is now the new Meyer Optik Görlitz GmbH, based in Bad Kreuznach. "I would particularly like to emphasize that the foundation fits perfectly into the anniversary year of Meyer Optik and that, 125 years after the initial foundation, we can now breathe even more life and substance into the whole thing," explains Timo Heinze.

What will change?

There will be virtually no noticeable differences in the operational business. The existing contact persons will continue to be available to customers and suppliers. Internal synergies, such as lens production by OPC Optics and Pfeiffer Präzisionsoptik, will of course also be retained and will continue to ensure the best possible quality of Meyer Optik products in the future. Meyer Optik Görlitz GmbH will operate independently, alongside its sister companies OPC Optics GmbH and PPO Pfeiffer Präzisionsoptik GmbH and under the umbrella of a common parent company. The transition to organizational and administrative independence is to be completed by the end of the year.

The next steps

The Trioplan 35 II, Biotar 58 II and Biotar 75 II are expected to be released in the fourth quarter, expanding the portfolio of lenses with classic models. Likewise, other new products are already in the works, so more new launches can be expected next year.

About Meyer Optik Görlitz

Meyer Optik Görlitz has a long history as a German manufacturer of high-quality lenses. Founded in 1896, Meyer Optik Görlitz is existent for more than 120 years. Thanks to the creative possibilities provided by the legendary lenses from Meyer Optik Görlitz, the brand enjoys a great popularity - now as then.

About OPC Optics

OPC Optics, founded in 2016 and based in Bad Kreuznach, Germany, is a specialist for high-precision aspherical and spherical lenses, double-aspheres, achromats and components and is a development partner and optics manufacturer for customers in the fields of photography, medical technology, automotive, laser technology, among others. In addition, OPC Optics offers technical consulting for projects and contract measurements of optical components. Thanks to state-of-the-art machines and extensive experience OPC Optics manufactures glass lenses in the highest possible quality and precision. By offering complete documentation from the glass melt, through the processing of the raw glass, to the final product, customers from all over the world rely on the services of OPC Optics.
