

Press Release

Together for the future - OPC Optics & Pfeiffer Präzisionsoptik join forces

- Cooperation as partner companies
- Bundling of competencies
- Corporation & structures

Bad Kreuznach/Gießen – 14th January 2021 – OPC Optical Precision Components Europe GmbH, based in Bad Kreuznach, and PPO Pfeiffer Präzisionsoptik GmbH, based in Gießen, are going joint ways since 1st January 2021, thus consolidating the foundations of both locations. The two complementary companies are working together as partner companies and represent a modern, flexible, and powerful competence team of the optical industry in Germany.

Timo Heinze, Managing Director of OPC Optics, is confident about the future: “Optics continues to be an extremely strong industry sector in Germany and we continue to see great growth potential from new technologies and the associated need for high-precision optical components. We have already worked successfully with Pfeiffer Präzisionsoptik in the past and were able to get a very accurate picture of their capabilities and high manufacturing quality. Thus, we are even more looking forward to the joint future and enabling ourselves to offer our customers a very wide range of services.”

Bundling of competencies

Pfeiffer Präzisionsoptik is particularly well known as a manufacturer of high-quality endoscope and micro-optics. The joint future with OPC Optics will result in an even broader range of services that can now be offered to customers from one source. For example, it will be possible to produce lenses with diameters of 1-200 millimeters and realize shorter production times than before.

“Thanks to the additional production facilities - especially for very small lenses - and the general increase in our production capacity, we can now respond even more quickly and flexibly to our customers' wishes and implement projects that were previously difficult or impossible for us to realize,” explains Timo Heinze.

Corporation & structures

From the point of view of customers, suppliers and partners, the companies operating jointly in the future will be available as usual and will be able to handle inquiries, projects, orders, etc. even more efficiently, quickly, and competently than before. The staffs of both locations will remain, so that the usual contact channels and persons can be used as before.

The facility in Giessen will be managed by the previous owner of Pfeiffer Präzisionsoptik, Mr. Marco Pfeiffer. "I am very pleased that Mr. Pfeiffer is still on board and will contribute his expertise to the joint future. We are

absolutely convinced that the cooperation of the two companies will generate synergies that will give our joint customers a not inconsiderable advantage, enabling them to position themselves even more strongly on the national and international market," says Timo Heinze.

About OPC Optics

OPC Optics, ein im Jahre 2016 gegründetes Unternehmen mit Sitz in Bad Kreuznach, ist Spezialist für hochpräzise asphärische und sphärische Linsen, Doppel-Asphären, Achromaten und optische Baugruppen. OPC Optics ist Entwicklungspartner und Optik-Hersteller für Kunden unter anderem aus den Bereichen Fotografie, Medizintechnik, Automotive, Lasertechnik und bietet darüber hinaus technische Beratung bei Projekten, sowie Auftragsmessungen optischer Komponenten an. Mit seinem Hightech-Maschinenpark setzt OPC Optics auf sehr hohe Qualität und Präzision bei der Fertigung von Glaslinsen. Dank vollständiger Dokumentation von der Glasschmelze, über die Verarbeitung des Rohglases, bis hin zur fertigen Linse, vertrauen Kunden aus aller Welt auf die Leistungen von OPC Optics.

About Pfeiffer Präzisionsoptik

PPO Pfeiffer Präzisionsoptik GmbH (formerly Pfeiffer Präzisionsoptik e.K.) is, after its foundation in 2015 and the takeover of the business activities of the company E. Färber Präzisionsoptik GmbH & Co.KG on 01.01.2016, specialized in the production of spherical lenses in the range of Ø1mm - Ø30mm. By investing in the latest measurement technology, the highest requirements can be met. Pfeiffer Präzisionsoptik offers its customers individual sampling as well as complete series production of optical components. In this way, Pfeiffer Präzisionsoptik has been able to establish a very good reputation in recent years with regard to the shortest delivery times and the fulfillment of the highest requirements.
